- Confident public speaker
- Hard Working
- Reliable
- Kind
- Creative

PROFILE

Creative and practical BSc Marine Biology undergraduate at the University of Exeter with hands-on experience in marine conservation, habitat restoration, oyster stock monitoring and community engagement. Experienced in ecological fieldwork, volunteer coordination, and environmental education, with a strong interest in restoring coastal habitats and supporting community led marine conservation initiatives across Cornwall.

CONSERVATION EXPERIENCE

Volunteer, Solent Oyster Restoration Project Biosecurity Event

May 11- 14th 2026

- Assisted with biosecurity measures supporting oyster restoration in the Solent.
- Gained practical insight into oyster restoration and estuarine conservation techniques whilst working alongside practitioners and volunteers.

Volunteer, CIFCA Oyster Restoration Project

March 2026

- Helping to redistribute 25,000 native oysters into Falmouth estuary to ensure the future of oyster fisheries and part of a long term conservation objective to regenerate oyster beds.
- Chosen to be interviewed when covered on ITV news.

Fundraising and Social Media Volunteer, Hastings Kelp Restoration Project

July 2025 - present

- Social media content creation, fundraising and sponsorship plans for an emerging conservation project in Hastings, East Sussex.
- Assisted with marine habitat restoration surveys, vessel operations and seabed monitoring.

Volunteer, Cornwall Marine Pathology Team

September 2025 - present

- I have assisted with sample collection and photography during post mortem examination of cetaceans and pinnipeds.

Animal Care Team Volunteer, Cornish Seal Sanctuary

April 2025

- Working with the resident care team, performing daily checks on the seals, learning resident specific information alongside cleaning kit and making new enrichment toys.

Volunteer, CIFCA Annual Oyster Survey

January 22nd-24th 2025

- One of two students selected to help with the Cornish IFCA annual oyster survey.
- I assisted the team as deck crew with sorting target species, measuring oysters and scallops, and identifying by-caught species.

Volunteer, Dysons Field community Garden Project

January 2025 - January 2026

- Part of a small team working with local conservationists to create habitats for resident species in a community garden on the Helford.

EDUCATION

Battle Abbey School

September 2019-July 2023

GCSE : Grades 7-9

Alevel : A*A*AB

English Literature, PE, Geography, Biology

University of Southampton

September 2023-July 2024

BSc Marine Biology

First year rep

University of Exeter

September 2024-July 2026

BSc Marine Biology 2:1

Relevant modules : Ocean Management and Conservation, Exploitation of the sea.

Dissertation working with Cornwall IFCA on benthic species identification from the Eddystone reef and proxies for disturbance from bottom towed fishing.

SOFTWARE

- ArcGIS
- R studio
- Microsoft Excel, Powerpoint & Word
- Canva
- Social Media Managment Platforms

INTERESTS
